

Mostafa Khrais

Full-stack Developer

Mostafakhraisus@gmail.com | +972597570800 | Gaza, Palestine

SUMMARY

Full-stack web developer with practical experience building complete websites, from the interface down to the database. Currently studying Mobile Application Design and Development at UCAS, with a background in HTML, CSS, JavaScript, and Java for Android. Have delivered real projects for clients as well as personal work, and I'm comfortable handling a project end to end.

EDUCATION

B.Sc. Mobile Application Design and Development — University College of Applied Sciences (UCAS) *(Nov 2025 – Present)*

Coursework covers mobile app development, UI/UX design, and full-stack programming.

Tawjihi (General Secondary Education Certificate) – Literary Stream — Palestine *(Oct 2025)*

Final average: 84%

TECHNICAL SKILLS

- HTML, CSS, JavaScript
- Java, Android Studio
- Database design and integration
- Full-stack web development (front-end to back-end)
- UI/UX design for web and mobile
- Git and version control

PROJECTS

Patagonia — Tourism Website — Client Project *(2025)*

- Built the site end to end: front-end pages with HTML, CSS, and JavaScript, plus the back-end and database behind them.
- Designed the layout so visitors can browse tour packages and destination info without friction.
- Set up the database that stores and manages the site's content.

Manara — Android App and Website for Tawjihi Students — Personal Project

- Building a full-stack platform for Tawjihi students: an Android app in Java plus a companion website, both running on the same database.
- Handling the app screens, the site, and the data layer myself, with the project tracked in Git.

ADDITIONAL SKILLS

- Web development courses before university, covering front-end and back-end basics.

LANGUAGES

Arabic (Native) English (intermediate level)
